- + Durable synthetic leather palm material
- + Airprene cuff
- + Terrycloth thumb panels

FEATURES

- + Compression molded finger protection
- + Silicone gripper fingertips
- + Palm padding

BLACK/SILVER NAVY/BLUE RED/GREY

INSERTS

DK DRY™ INSERT

A performance membrane that assures your gloves will be waterproof, windproof and breathable. The insert is a complete moisture management system that moves water vapor from your hands while at the same time keeping the elements out.

GORE-TEX XCR® INSERT

The GORE-TEX® XCR® glove inserts are the newest innovation from Gore. The lining, insulation and shell components of a GORE-TEX® XCR® glove are qualified by Gore to ensure minimal restriction to the transfer of perspiration. These are the first gloves designed specifically to be durably waterproof and breathable enough to keep your hands dry from the inside when you're active outdoors. The result is a hand-warming system that keeps your hands drier, warmer, longer.

- Layer 1: Durable nylon nonwoven
- Layer 2: GORE-TEX® membrane

GORE-TEX 3 LAYER® INSERT

Provides ultimate durability and protection from the weather in demanding backcountry expeditions or days at your local hill.

- Layer 1: Durable nylon nonwoven
- Layer 2: GORE-TEX® membrane
- Layer 3: Same as layer 1

GORE-TEX SOFT® INSERT

Softest insert available with a high level of durability for performance fit glove styles. It is virtually invisible within the glove and does not detract from the dexterity designed into lightly insulated gloves.

- Layer 1: Durable nylon nonwoven
- Layer 2: GORE-TEX® membrane

INSULATION

THERMOLOFT™

Synthetic insulation that retains loft in the harshest conditions providing warmth and comfort. Non-bulky for a comfortable fit.

PRIMALOFT®

Primaloft insulation products offer superior performance for high quality cold-weather gear. Primaloft is lightweight, breathable and is proven to repel water better than any other synthetic or natural insulation, so you remain dry, warm and comfortable even under the most extreme conditions.

PALM MATERIALS

RUBBERIZED CLARINO® PALM

A premium palm material for all riding conditions. Constructed with a superior rubber compound that is bonded to synthetic leather for the ultimate abrasion resistant, waterproof, high grip palm.

TOUGHTEX®

A polyester fabric with a PVC based non-slip surface treatment applied to it. In addition to being waterproof, it has excellent abrasion resistance and provides protection for the hands.

POSGRIP™

Performance and value wrapped into a palm material that provides solid grip, dexterity and waterproofness.

LEATHER PALM

Premium cowhide leather for the ultimate in dexterity, comfort and breathability. Pretreated for waterproof protection and long lasting performance. Gets better with time as it breaks in.

CANDIDE

SNOW SERIES

Load one up for a smooth and safe day in the backcountry.
Dedicated snow tool pockets, lots of lash points and stable carry systems.
Tough, proven designs that simplify the work of picking the best line.

Progress to bigger backcountry terrain with this next level pro pack. Carries boards both ways, a shovel in a fixed space and organizes extra gear on the inside. New added volume, insulated hydro sleeve and a backcountry pad to wait for the perfect window.

From Baker to Brighton this pack is a badge worn by locals who know where to go. Three carry options, zippered shovel opening and quick draw holster. Retooled with straightforward function and the ideal volume for hiking the arm or lapping the double.

INSULATED HYDRO SLEEVE

CROSS-CARRY SYSTEM

VERTICAL SNOWBOARD CARRY

DIAGONAL SKI CARRY

An easy choice for everything from six-inch mornings to Alaskan bliss. Ski or board carry modes, quick access blade pocket and space to upload the out-of-bounds basics. Designed with a super skinny profile and featured for tracking up everything in sight.

The pure powder day minimum. Space for safety gear, less straps to snag and a nicely balanced profile. Content whether taking speed runs off the box, loading up on the summit chair or hiking for one last run on the headwall.
