*Pat Moore*

*All snowboarding is local. No matter where we normally ride, it's the hidden hip, secret shot or whole new zone that makes a good day sick. Yet lines are not limited to a home hill, as dropping-in on someone else's spot is part of the deal. Stumbling on prime terrain, hooking up with a new crew or getting shown the goods are all in the cards when visiting a new area. Each mountain has its stashes, scenes and customs, but these eccentric peripherals make each mission unlike the ride back home. And that regular switch keeps things fresh and fun.*

*Dropping a new line has always fit the Foursquare vibe. Since day one, our gear has earned respect at every hill because we set our own style with inspiration rather than duplication. We select only top-shelf waterproof/breathable fabrics, smooth snap-out heaters and insulating high-loft fill for construction to keep weather in check. Each functional feature is designed from a lift-to-line perspective that keeps design simple and clean. But the final element is refined style that leaves a strong impression in any scene that we know how to ride.*

(Diagram represents only a portion of the total women's outerwear features)

(Diagram represents only a portion of the total women's outerwear features)

1. CROSS-BREEZE VENTS

Dump heat quick when hiking with the cooling cross-breeze of vents inside and out. No-snap mesh keeps snow outside and adds flash with printed pinstriping.

2. GLOVE HOLDERS

Stash gloves with a single snap when eating lunch, retying boots, buying a lift ticket or screwing with bindings. The tensioned cord hides beneath a cargo flap when idle.

3. WATERPROOF/BREATHABLE MEMBRANES

This thin, permanent film on the inside of our shell fabric prevents snow, sleet and rain from breaking the seal. Microscopic pores allow sweat to escape when charging hard.

4. SHELL FABRIC RATINGS

From 5K to 25K our waterproof fabric ratings identify the seal at the shell. The second number in the mathematical formula is breathability, which utilizes microscopic pores to let steam and sweat vapors escape to prevent the kit from overheating.

5. PRO PATTERNS

Eddie goes stealth when riding for fun and bright when filming for exposure. These two patterns satisfy the alternating requirements of his pro-level profession.

6. SNAP-IN WARM-UPS

The heaters in our convertible series snap in with a no-zip interface that allows unhindered bend-and-twist mobility while still allowing for fumble-free operation of the waist gaiter.

7. SHEDDABLE HOOD FUR

All our faux hood fur can be peeled off quickly when high pressure is the rule. When cold air returns, snap it back on and warm up, Arctic-seal style.

8. FOG-FREE EXHAUST

When bunkered in the collar to save face on the chair, our exhaust vent channels each see-your-breath exhale out existing mesh vents so goggles don't fog.

9. MIX-AND-MATCH CHEAT SHEET

Each jacket and pant in the line comes with a custom style guide to prevent clashing your kit when matching plaids, patterns, stripes and solids.

10. 20/20 HOODS

Cinching both peripherally and around the aperture, our detachable hoods shut out elements while still keeping the line or the landing in clear view. No blindsides means fewer tumbles.

11. CROSS-THIGH CARGOS

A Foursquare signature, this lift-access configuration stows high-priority stuff in the cargo and also dumps heat chimney-style through a zip-open thigh vent inset above the pocket.

12. CHILIDOG GUSSET

When another dog at lunch creates an immediate need for more girth, this notch of Lycra® expands to give an extra inch of room around the belt. Men's pants only.

13. TAB-DOWN WAIST GAITERS

Custom tabs in all Foursquare pants allow a quick link between jacket gaiter and pant band. The result is a bombproof—or bomb-hole-proof—seal against snow.

14. FULL SEAM TAPING

At the 10K threshold and above, every stitch of seam is taped to ensure a leakproof seal. The 5K styles use critical taping to stop seepage in the seat and shoulders.

15. OVERLAPPED ARTICULATION

Instead of just pinching it off at the knee, we fold our pleats in a military-style overlapped construction for a distinct look that allows for a greater range of motion.

16. CUSTOM TRIMS

We invest time and thought into each Foursquare trim to give it the refined style that makes our brand so highbrow. From zips to tape each special trim is verifiably custom.

17. FIXED SYNTHETIC FILL

Lofted synthetic insulation brings a higher degree of warmth to our insulated and convertible pieces. This shiver-resistant fill traps heat even during wet storm cycles.

18. DROP HOOD CONSTRUCTION

Dropping down for zero-blind protection but hanging back with no chokehold, our fixed hood lets the collar stand when not in use.

19. HOT POCKET GAITERS

Keep the cuff-to-cuff gap covered with this stretch gaiter. Stashes a single-serving heater at each wrist to regulate total body temp.

20. GHOST GAITERS

Shockcord this gaiter tight with a thumb-through entry to reduce wrist exposure. Low-bulk design keeps the stealth gaiter undetected when not in use.

21. ZIP-TIGHT HEM

Raise hems above mud, grit and asphalt without bending down or rolling them up. A special non-opening zipper adds five inches of lift with a single one-way motion.

22. PULL-TIGHT HEM

Pull cuffs out of the muck with this taffeta tab system that tucks inside inseam vents. Two-level snap provides different levels of lift to match personal sag.

23. SNAP-TIGHT HEM

Instead of rocking pirate pants, this feature snaps hems up into the leg lining to protect cuffs from wear, grime and being dragged through the mud.

24. BATTERY-CHARGED HEATED LINER

Dial in the right temp with this electrified fleece liner. A removable controller turns up heat from one hand pocket while a removable battery plugs into the other and delivers eight hours of heat on a six-hour charge. Soft, washable wiring transfers heat to chest and shoulder panels.

25. TICKET WINDOW

Keep the pass or ticket tucked safely away with our under-flap access pocket. An easy one-handed lift when asked to show your pass. No more leashes, laces, cords or strings.

26. GOGGLE POCKET

Being ready with a spare pair on a deep day means more fresh tracks than your buddy who forgot to think ahead. Stash yellow lens specials at hip level in our scratch-resistant pocket.

27. INTERNAL SECURITY POCKET

Stow the stuff it would suck to lose until spring on the inside, and zip this interior pocket closed to keep them safe. No more sweeping for keys after a scorpion.

28. MEDIA POCKET

No sick day is complete without the soundtrack. This pocket stashes your pod inside and routes cords internally so eclectic playlists with everything from Death Cab and Jurassic 5 to Kiss and Motorhead keep rocking without interruption.

29. MEN'S LINING

Vertically striped linings add a bit of classic flash when suiting up in the A.M. or stripping down at the car. Tan, grey, black or blaze.

30. BOOTY ACCESS FEATURE

Tighten or loosen SLR laces in line or on the chair by simply pulling, tucking and re-zipping. Inset in the pocket, this handle-width opening Velcros® closed when boots feel just right.

31. THREE-LAYER FABRIC

Our three-layer 25K fabric features a translucent tricot backing that feels smooth on bare skin. Highly waterproof and highly breathable.

32. FUSION SEAM TECHNOLOGY

Fused seams and zips prevent single-stitch punctures of the waterproof seal and save on stiffening seam tape.

33. HIDDEN HOOD CINCH

By tucking toggles inside the chest pocket, this cleaner cinch system keeps hands protected when battening down the hood on storm days.

34. BACK ARM VENTING

Anatomically placed arm vents allow heat to rise skyward when riding hard. A left/right configuration keeps the shoulder blades free of stiff zippers.

35. HIP VENT PLACEMENT

Outseam positioning keeps zippers at arms length, whether sitting on the chair, hiking the pipe or balancing carefully on heelside.

36. GOOSE DOWN

A feathery supply of 80/20 goose down insures our 25K puffy is packed with a high feather-to-fill ratio. This high-grade mix means lots of warmth with minimal weight.

37. STOWABLE BALACLAVA

For days that mandate zero exposed skin, this stashed protection keeps the face covered when riding out severe windchills. Single snap attaches clava to collar.

38. TAILORED FIT

Modern and stylish, this fit trims the sag out of the standard snowboard silhouette. A more sophisticated way to rock the latest on-hill style.

39. BAGGY FIT

For girls who will rock only the biggest and baggiest, this XL fit option is designed to enable pants to sag low on the hips. Big loops allow for a thick studded belt.

ARROYO JACKET

This convertible keeps on-hill style both clean and technical. Snap-out jock jacket lounges in luxury and under-cover cinches protect hands when engaging the hood.

10,000 mm Waterproofing / 10,000g Breathability

- Stealth hood adjustment
- Pit zips
- Sleeve pocket
- Snap-out breathable tricot warm-up with rib knit binding
- Fixed hood
