

From a company with a history of firsts, comes a line primed for speed

From Brad Van Liew's victorious Open 60 to Olympic-focused Tornados, Samson's lines have been intertwined with the familiar feel of success. Recognizing a performance void we unsheathed Apex, a lightweight single-braid tuned to the intensity of competition.

Available in 3/16" to 1/2" diameters, our new race-ready line delivers quick and fluid control. Braiding the low-stretch strength of Dyneema with the good grip of MFP, it floats, won't kink and is easy on the hands. The effect is smoother sailing and a firm fix on being first to the finish.
