shroud of purrin jacket

style 307W305

~~\$258.00~~ \$128.50

Falling hard for this one striking shell is a forgivable sin. Its blend of sensual, alluring interior warmth and an sleek exterior belies its natural ability to excel when the lines get steep.

Performance

The key is stretch soft-shell fabric, which enables uninhibited motion and blocks the nastiest of winds. Faux-fur fleece on the inside simply adds the right amount of luscious winter warmth.

Sustainability

Instead of feeling guilty, know that post-consumer and post-industrial polyester waste created the recycled material for the furry fleece, mesh linings and stretch shell fabric of this piece. Along with requiring no new oil, the versatility of this design replaces several specialized shells with one purchase.

asylum jacket

style 307W205

~~\$398.00~~ \$198.50

Far from normal storm-day fare, this protective mountain shell beautifully blends subtle style, technical construction and original thinking.

Performance

Three layer waterproof/breathable fabric, material stretch and breezy torso venting elevate the alpine utility of this unassuming shell. Modern construction elements such as stitchless seams, a molded front zipper and a stretch powder skirt show enviable form whether lapping quads or setting skintracks.

Sustainability

By utilizing post-consumer and post-industrial recycled polyester waste instead of virgin petroleum, this three-layer shell is a prime example of minimized impact. The fact that it can be recycled down the road prolongs its cycle of life.

down shirt

style 307W409

~~\$175.00~~ \$87.50

"A continuously warm embrace without looking like a lumberjack," is how our designer describes the feeling of sporting this fashionably lofted shirt in your local hood, in the base village or way out in the sticks.

Performance

Light, lofty, warm and supple all describe this mix of high-grade down and feathery-denier shell fabric. Visibly variegated baffling feels fresher than a standard puff pattern, while grapefruit-sized compaction makes it easily crammable into your favored messenger bag.

Sustainability

Like all plumage, down is renewable. Carrying that natural thinking forward, the 850-fill variety we use represents a more responsible core-warming strategy. As is our custom, 100% recycled polyester ripstop keeps the fill contained.

indulgent jacket

style 307W407

~~\$160.00~~ \$79.50

Winner, 2008

Best of Adventure Gear

When designers christen you the "sex kitten" fleece, you must be hot. This seductive style, which wears both warm and sexy, lives up to the billing.

Performance

Satisfying Polartec Thermal Pro pile is what makes us swoon for this pleasurable indulgence. The fabric presents a tastefully clean surface but reveals a sensuous interior to those lucky enough to experience the warmth inside.

Sustainability

This fleece makes us feel good for many reasons, not the least of which is that the Polartec Thermal Pro fabric is made using Tejin EcoCircle™ technology. We also get a warm, fuzzy feeling from working with a company such as Polartec, who understands the importance of a local economy.

cocoon trench

style 307W408

~~\$298.00~~ \$148.50

Cocooning takes on a new meaning when this full-length down trench is selected as your potent source of warmth in frigid climates.

Performance

Warm all the way to boots, the shaped cut and distinctive quilt show stylistic range that's right at home on the urban avenues, both foreign and domestic; the lightweight fabric and fill means it packs small for big trips.

Sustainability

Fully recycled face fabric, a fully recycled lining and renewable goose down fill all make this a low-impact way to strut into town. High-caliber construction ensures a long, happy lifespan and classic style means relegation to the consignment shop is not in this coat's future.

merino2 ls zip

style 307W517

~~\$98.00~~ \$48.50

Making the first layer choice simple, this luxurious merino long sleeve will be a constant companion for winter activity.

Performance

Modern merino wool, which warms when wet, sits softly on skin and fights odor retention, forms the fine foundation for this active day base. Spandex shape, machine-washable fabric and thumb loops that keep sleeves down during action, all beautifully blur the line between form and function.

Sustainability

We love wool for its renewable nature, but shorn sheep often get a raw deal. To show concern for the flock our supplier shepherds, we insist on Zque certification. This verifies through independent audits that high standards of animal welfare, environmental health and social values are maintained.

base2 mock

style 307W120

~~\$74.00~~ **\$36.50**

Mix one part performance thermal fabric and one part subtle style. Stir. Layer with outerwear of choice, or wear alone without feeling like you're sporting a look that screams "sporty."

Performance

The wicking, warming and stretching ability of Power Stretch technology is what gives this fitted fleece mock its active winter feel. Slick PLA at the neck, hem and cuff allows smooth sliding under warm layers or soft shells, yet also displays enough refinement to hold its own in the daily routine.

Sustainability

In addition to using no virgin polyester, this 92% recycled fabric is manufactured domestically by Polartec, a company repeatedly lauded for standing by its local community.

asylum pant

style 307W206

~~\$278.00~~ \$138.50

This shaped shell pant fits perfectly whether ripping steep longboard lines, touring light on AT gear or making smooth tele turns.

Performance

The secret is an original design that blends waterproof fabric and modern stitchless construction with patterning defined by a sweeping cuff, shapeable waist and flattering rise. Mindful features such as thigh vents, edge guards and flat pockets take every aspect of vertical participation into account.

Sustainability

By utilizing post-consumer and post-industrial recycled polyester waste instead of virgin petroleum, this three-layer shell is a prime example of minimized impact. The fact that it can be recycled down the road prolongs its cycle of life.

base2 pant

style 307W121

~~\$75.00~~ \$37.50

Finding the nexus between attractive, comfortable and functional, these pants are respectable wear for layering or lagging, even in mixed company.

Performance

Grid-fleece fabric wicks and warms without extra bulk, while a shaped rear panel tightens the butt. Perfectly fitted for layering on a powder day, scoring spring mix at the Farmer's Market or re-hydrating after Bikram.

Sustainability

Using recycled polyester material for the primary and secondary fabrics gives this piece a general feel-good aura. Knowing the Polartec Power Stretch was made domestically by a responsible supplier adds to the altruistic allure, while going green at the very first layer feels personally satisfying.

succinctshell jacket

style 108W207

~~\$150.00~~ \$75.00

A light, packable shell that hits the sweet spot between heavyweight protection and easy-to-pack compressibility.

Performance

Simple in the best way, this shell is stripped down to the bare essentials. Our lightweight 2.5-layer shell delivers absolute (hard) protection from the worst weather. Completely wind- and waterproof with DWR treated fabric surface for water repellency. Breathable, for comfort during exertion. Excellent weight-to-compressibility ratio makes this go-to piece ideal for backpacking and travel.

Sustainability

With an eye on the full circle, this jacket uses discarded plastic and industrial waste recycled, via the Eco Circle™ process, into high-performance fabrics. And, at the end of its days it can be put back in to the closed-loop system to create entirely new fabrics.

confidant short

style 108W529

~~\$98.00~~ \$49.00

Few catalog specials or thrift store finds can match the nuanced tailoring, urban sophistication or tropical wool comfort of this modest long short.

Performance

Formulated with bike and boulder versatility, every aspect of this short's progressive vintage design shows forethought and follow-through. From a button-backed snap tab to a finite weight of wool for comfort, it is calculated for that space between formality and spontaneity.

Sustainability

The best thing about using animal fibers like wool is that they are a renewable resource. However, there are numerous factors to consider in their production: animal health, grazing, land use issues and the processing of raw wool into fiber among them. Our wool is processed without the use of an extensive list of restricted substances, and our efforts to ensure our fibers come from sustainably managed sources is ongoing and constantly evolving.

lithe short

style 108W534

~~\$86.00~~ \$43.00

Sexy and functional all at once, its quick-dry nature makes it ideal for wet weather excursions.

Performance

Sculpted from two-way stretch recycled polyester, these shorts perform in wet or dry conditions, without compromising on fit or style. Material elasticity provides full stretch when climbing walls, hiking trails or simply cruising the bike lane.

Reduced bulk at the waist wears comfortably under a harness or pack, while still flattering when on the bike.

Sustainability

The fabric is made with 95% recycled polyester, sourced from recycled consumer waste.

lithe pant

style 108W536

~~\$118.00~~ \$59.00

Utility is rarely sexy, yet in this case straight shape off the hip, laminated belt loops and jean pockets give a practical pant an irresistible aura.

Performance

Streamlined and straightforward, this pant offers balanced (soft) protection from wind and moisture, with extreme breathability for high exertion. Our two-way stretch fabric has a smooth interior for next to skin comfort while the exterior double-weave texture spices it with surface interest. Stretch and shape contribute to the character, while a wider waistband fits comfortably and moves naturally. The twill loop interior dissipates perspiration.

Sustainability

The fabric is made with 95% recycled polyester, sourced from recycled consumer waste.

two-faced crew

style 108W120

~~\$58.00~~ \$29.00

Moving beyond the simple T, this chilled out sleeve blends next-to-skin performance with toned down style.

Performance

Complementary fibers-with mesh PLA next to skin and organic cotton at the surface-create the textile structure that draws out moisture and generates a natural cooling effect when working up a sweat. The casual drape completes the package, for a successful design exercise for real life.

Sustainability

Using Ingeo™, a biopolymer made from PLA (polylactic acid) derived from corn, favors renewable resources over oil. Ingeo™ wicks naturally, so there's no need for wicking finishes.
